

BUCA FACULTY OF EDUCATION

OUR MISSION

Having high quality academic staff who undertake the leadership in the social transformation of the contemporary society; can establish effective communication with stakeholders; whose innovative, creative and ethical values are improved; follow and generate new educational technologies and meet international standards through their education and research projects in the field of teacher education, Buca Faculty of Education aims to educate academics and researchers who will form the future of our country and our people, by enhancing the educational environment of students and lecturers (classrooms, laboratories and offices). Besides, our faculty aspires to educate teachers who will become social engineers who contribute to the social, cultural, economic, scientific and technological development of our nation and humanity by carrying out research and teaching activities in this area at universal standards. All of our academic departments aim to train qualified teachers who are aware of contemporary assessment and evaluation approaches, can organize instructional activities in the direction of technological developments, use different teaching methods and strategies in their teaching processes and follow the work done in the field.
