DEPARTMENT OF BUSINESS ADMINISTRATION

The objective of the Department of Business Administration is to provide students with the most up-to-date information and to educate them as graduates who have adopted teamwork; who can propose creative solutions; who have global thoughts and are able to use planning, coordination and control mechanisms and human resources in the most efficient way to increase the productivity of the business, to make them ideal candidates for intellectual, entrepreneurial, leader and managerial staff who can compete on national and international platforms.

DEPARTMENT OF ECONOMICS

The objective of the Department of Economics is to provide our students with a high level of education in economics; to enable them to conduct research using the most advanced techniques and methods for both theoretical and practical applications, and to provide them with the skills to make inferences and develop policies by using analysis techniques.

DEPARTMENT OF PUBLIC ADMINISTRATION

The objective of the Department of Public Administration is to educate upper and middle level managers who have the necessary qualifications to work in the public and private sectors. The courses and the education-training methods in the program aim at helping the students gain an analytical perspective and a questioning understanding as well as providing them with the basic information about the field.

DEPARTMENT OF FINANCE

The objective of the Department of Finance is to meet the needs of the state's financial staff and specialists and to educate the students on the domestic economy and on the rules of the world economy; to educate them in accordance with the needs of the public sector. It also meets the needs of financial institutions that are active in the private sector.

DEPARTMENT OF ECONOMETRICS

The objective of the Department of Econometrics is to train the students as potential staff with the ability to analyze and resolve existing economic problems using quantitative analysis techniques. In addition, the Department of Econometrics establishes a bond among the other departments of the faculty and bridges the departments of the Faculty of Economics and Administrative Sciences and the other faculties in terms of their common features and the similarities of the departments within its body and the applicability of econometric methods in various fields of social, physical and health sciences.

DEPARTMENT OF LABOR ECONOMICS AND INDUSTRIAL RELATIONS

Labor Economics and Industrial Relations is a scientific discipline that deals with the economic, social, psychological and legal dimensions of relations in working life, works on the measures that will establish social peace, social justice, and employee welfare and increase productivity and competitiveness of businesses. The department aims to educate "Labor Economics and Industrial Relations Experts" who understand the changes and transformations in working life and who have the ability to use their professional knowledge in changing conditions, in accordance with the qualifications demanded by the labor market.

DEPARTMENT OF MANAGEMENT INFORMATION SYSTEMS

The objective of the Department of Management Information Systems is to provide well-educated graduates with business and management orientation who will be able to make significant contributions in the implementation of planning, design and information systems, and to play an important role in the continuous production, renewal and dissemination of information within the discipline of Management Information Systems.
